Happy Head Front-end Developer

Happy Head (https://www.happyhead.com/) is a *rapidly growing and profitable* telehealth startup. which lies at the intersection of Telemedicine, Health & Wellness, Technology, E-commerce, D2C, and Pharma. **We seek a Front-end Developer,** who loves what they do, to partner with product and engineering to develop and expand the user experience for both our customers and our internal users.

This is an opportunity for you to make an impact on a fast-growing health & wellness startup. Your daily contributions will generate tangible value for the company as its pace of scaling accelerates.
Our company has a strong management team of industry experts and a fantastic pipeline of business, enabling us to aggressively expand the team with the scale of the business. We are already profitable, approaching 8-figure revenue, and up over 8x in just 12 months. Our Founder/CEO has led several successful venture-backed companies and has a track record of mentorship and promoting from within. You will report to our Lead Engineer and work closely with our Head of Product

WHAT YOU WILL BE DOING:

We are looking for a Front-End Web Developer who loves combining the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

- HTML and CSS to develop new user-facing features with a mobile-first approach
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
- Collaborate with product, web designers, and back-end developers to improve usability
- Create quality mockups and prototypes
- Help back-end developers with coding and troubleshooting
- Ensure high-quality graphic standards and brand consistency
- Stay up-to-date on emerging technologies

REQUIREMENTS:

- 4+ years of experience as a Front End Developer/Integrator, including HTML5, CSS3
- 3+ years of experience in any recent client-side Javascript Frameworks and Typescript

- Experience mentoring junior developers
- Good understanding of server-side CSS pre-processing platforms, such as LESS AND SASS
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with using tools such as as Figma, Photoshop and AdobeXD
- Familiarity with browser testing and debugging
- Understanding of the entire web development process (design, development and deployment)
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Proficient understanding of code versioning tools, such as GitHub
- Understanding of SEO principles and ensuring that application will adhere to them.

Happy Head offers a wide range of benefits for our team members, including Medical, Dental, Vision, Unlimited Paid Time Off, Paid Sick Time, Paid Holidays, and Education Reimbursement, Monthly Wellness benefit.

Happy Head is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to, and will not be discriminated against based on age, race, gender, color, religion, creed, marital status, pregnancy, disability, national origin, sexual orientation, gender identity, veteran status, or any other protected category.
